ACADEMIC PROJECT EXPERIENCES

Major Project

Project name : Catch You if You Misbehave: Ranked Keyword Search
Results Verification in the cloud computing
Duration : 2 months
Team size : 4 members
Environment : Microsoft Visual Studio 2008, SQL Server

Description:

With the advent of cloud computing, more and more people tend to outsource their data to the cloud. As fundamental data utilization, secure keyword search over encrypted cloud data has attracted the interest of many researchers recently. However, most of existing researches are based on an ideal assumption that the cloud server is “curious but honest”, where the search results are not verified. In this paper, we consider a more challenging model, where the cloud server would probably behave dishonestly. Based on this model, we explore the problem of result verification for the secure ranked keyword search.

ACHIEVEMENTS AND AWARDS

- Received prize for speech in school
- Certificate from kakatiya university as one of the organizer for TECHNO SUMMIT 2016
