Project

MINI PROJECT: SECRET MESSAGE

Secret Message is a data privacy and security make up one of the most important features of a person's life. One cannot communicate securely anymore there is always some eavesdropper or a chance of leak of information. Cryptography deals with helping to make data more secure. This is the study about the classic cryptographic algorithm so that our data security is more authentic and secure.

MAJOR PROJECT: EYE BALL TRACKING WITH OPEN CV

In Eye ball tracking, we track the position of the user's eyeball in real time using a camera. For tracking the eye-ball we have used machine learning and open-cv. When the user stares at a particular image for a particular time, then the coordinates of the gazed position is retrieved, from it that particular image is extracted then the specification of image is displayed on the terminal.

SKILLS

- COMMUNICATION SKILLS
- CREATIVITY
- TEAMWORK
- LEADERSHIP
- ADAPTABILITY

TECHNICAL SKILLS

- C LANGUAGE
- JAVA
